- E. SESSION SUMMARY

The target is outside with uneven terrain and has the color bright green at the site. Water can be found in the vicinity. The site is busy and active. There are transportation vehicles/cars moving at a very fast rate on a roadway or through a thorough fare and people are present. A high, tall and large, lattice work structure is to the right which has support beams and is near a rocky area. A bridge and tunnels may be found in the vicinity. An object shaped like a wheel consists of industrial metal or steal and is turning around in motion. The word "colonial" phonetically surfaced. Although the target site itself is transient, people may live around the outlying area.
