Summary of Information  
(Session Two)

Immediate perceptions of statue-like images. There was an area that was carved out; a mixture of natural and manmade features. The natural material was reminiscent of exposed granite; the way in which it crumbles.

A trough-shaped object flashed. The concept of "the State of Michigan" flashed by as well. The sideways "V"-shaped object from session ~~one~~ was again apparent. There was a structure with an overhang present (see diagrams).

The target was associated with wrinkles, a striped shirt and "laid back". There were more wrinkles, "old", a mountain valley and the concept of traveling fast along some sort of pathway.

Received the perception that the "powers to be" already know what this guy looks like.

Present activity(ies) associated with the target included: small, private meetings in white, open collared shirts; casual walking; a collector of maybe statues or figurines. Several of the latter occur alone and isolated on top of their own platforms. The target is presently "self-assured". A currently perpetual trait of the target is his being mesmerized by computer generated graphics. There is a collection of sliced, orange objects reminiscent of sliced fruit.
