Summary of Information

The target consists of an area where there is an overwhelming feeling of an abundance of moving water and great power. The water is moving very rapidly, with great force and agitation and is being churned up in some areas of the site. An important aspect of the site is a rounded terraced feature with movement.

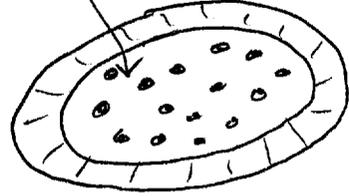

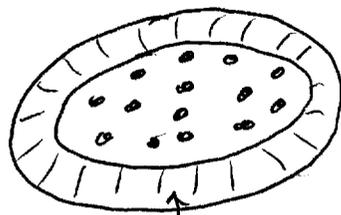

There is a great deal of smoke, steam or fog. Some of this is rising up from an area of incredibly jagged and rugged terrain. The rocky crags here are very dark and glistening.

There are oval shaped objects floating or suspended. They are green and yellowish-green in color. They appear to be moved along at random. There is an impression of age or ancientness here. It feels reminiscent of an ancient sea or seabed.

There is dense, rolling green around the periphery of the target. This is reminiscent of dense vegetation. This aspect has a feeling of wilderness and desolation to it. It is rolling, wet and has a closed-in feel about it.

There are a series of extending "V" shaped lines which are aligned in a row and are surrounded by a dark blue. There are also a number of triangularly shaped objects which are striped like rusty stains. They are crumbling and appear submerged in water. These objects appear as metal claws frozen in place by rust. There is a clanging sound associated with these objects.

There is a large object that has granulated and gritty associated with it. There are green squarish features, the color yellow and black round holes. The object is brown and beige and has numerous lines across it. Spotted gray fish with extremely pointed fins(?) are associated with the site.

SUMMARY OF INFORMATION

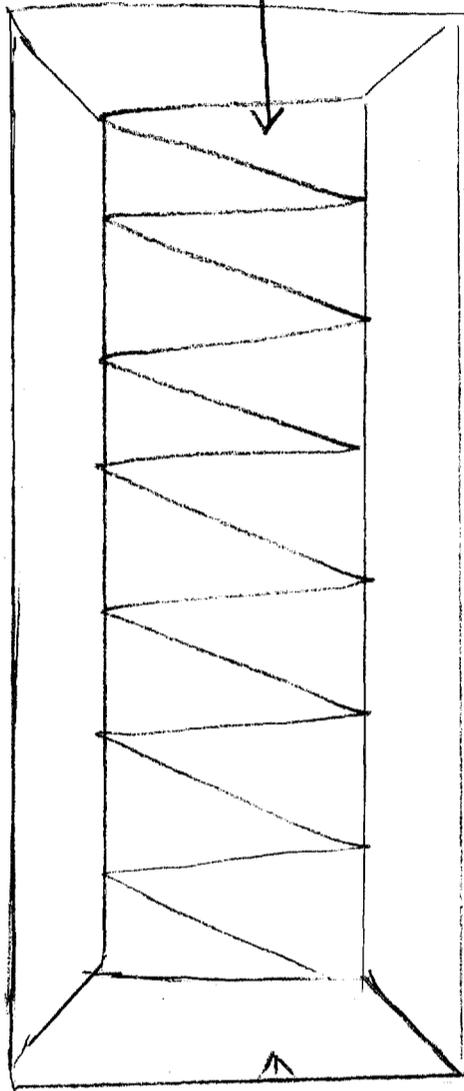

Dark green trees are in the background. There are several aspects to this site which are both natural and man-made. The target site is outside. There is a material structure raised above and built into the ground which is made of concrete and perhaps metal. This is an encasement. It is dark underneath this structure. One can see through the lines of construction. See attached diagram.

Water is at the site. There is a lot of concrete to include walkways and all kinds of people are here. In particular, there is a young woman traveling and a little girl walking on a sidewalk. Engine or motor sounds are present. The main color is green and there is some russet red at the site too.

The function and purpose of this site is for movement of people. People are in transit traveling across. The activity includes people watching the ground.
