1015 - 1105

(Tasking data sheet attached)

Summary: Site is composed of a large tract of land and numerous structures, some quite large. (A strong AOL of "gantry and rocket" was present at the beginning of the session). The whole place has the feel of a (A/S) "defense plant".

The target structure (object?) is horizontal, long, cylindrical/squat/"pod-like" with "ribs" (like a grub) [See sketch p.13]. I have not yet determined whether the ends are closed or open, however the impression is present that something can/should pass through it; (AOL-"test/diagnostics chamber").

[Comment: A tough target due to its proximity to more vertical, larger structures].
