MEMORANDUM FOR CHIEF SCIENTIST DEFENSE INTELLIGENCE AGENCY

SUBJECT: SUN STREAK Operational Report - 8928 (U)

1. (S/NF/SK) During the period of 11 September 1989 to 2 October 1989 inclusively, seventeen sessions were conducted to determine the nature of a key activity at a geographical location represented by Encrypted Coordinates 362104/453869. Results of this effort follow below,

2. (S/NF/SK) Remote Viewer 003 perceived the activity as occurring in a "blue chip, think-tank" atmosphere. A government-oriented group of personnel were working towards "a goal not publicized." It involved planning, orchestrating behind the scenes in an atmosphere of non-disclosure (secrecy). The people at the meeting appeared serious, grim on the one hand, and altruistic and dedicated to a common cause on the other. The ultimate objective was to determine the means to implement a course of action. The implementation was to be effected by subordinates, representatives of the personnel at the meeting. The target site appeared to be a hotel, an office structure located near a beach.

3. (S/NF/SK) Remote Viewer 018 perceived the key activities as being directly related to "concealed weapons" stored within double metallic walls. See TAB A. The metallic walls led 018 to believe that the concealed weapons were aboard ship. The weapons were cylindrically-shaped and closely packed in stacks. They were small, grayish-green in color and had spring-loaded fins. They resembled small missiles. The weapons were activated for use through the pushing and pulling of levers located on the side of the cylinder. The weapons appeared destined for use against insurgents.

4. (S/NF/SK) Remote Viewer 025 perceived the key activity as being directly related to an early warning "protection system".

025 perceived the presence of transmitters and antennas. The target site was located in a fenced area. Uniformed personnel and guard dogs were present.

5. (S/NF/SK) Viewer 032 believed the key activity was related to a meeting held by several men of similar political and religious beliefs, and dressed in business suits. The purpose of the meeting was to determine how to neutralize a threat to their status (not further defined). The group appeared threatened by gunmen and bombs. The presence of a vessel phonetically surfaced as being related to the issue at hand. It was identified as "Allied Trader"; it was anchored in a port north of the target area. See TAB B.

(OPS CMTS): At this point Viewer 032 believed this scenario to be drug-related. This appears to be in error.)

6. (S/NF/SK) Remote Viewer 079 perceived the target area as being located in a "third-world country," at the site of a previous (well-known) disaster. Dark-skinned people populated the area. The target site was located in the vicinity of a body of water and a mountain. At some (undetermined) time in the past, a search for lost people was conducted in the vicinity of the body of water. Viewer 079 then concentrated on an isolated, yellow, brick building in the area. Within this structure was a mobile object "on wheels" configured like an "upgraded canon". See TAB C. The object appeared to have no explosive capability. The object measured distances in a ground order-of-battle atmosphere. Small aircraft were observed as related to this activity. Personnel wearing red berets were located on the periphery and appeared intent on observing the object and its activities. A man was apparently tied-up (to chair) in the target area. (Relevancy of the man tied up in a chair was not determined.)

7. (S/NF/SK) Remote Viewer 095 perceived a large, gray, smooth three dimensional rectangular object that appeared to be related to the key activity at the target. See TAB D. It had smooth, "substance-tight" seams. Lengths, distances, measurements, fast motion, loud noises and pressure were concepts directly related to the object. There was a presence of underground tunnels perceived as long, lined, smooth and polished. They were surrounded by a "rock-hard" substance. See TAB E. The seams between the tunnel sections were of such smoothness as to make them indistinguishable. Additionally, there was a horizontally-

positioned object on supports estimated as being at about 50 to 60 feet off the ground. See TAB E. People in the area were clad in white, one-piece outfits and wore thick insulated boots. At this point, viewer 095 received the distinct impression that this was nuclear-related site.
