

WORKING PAPER

Project: 90102-3
Date: 900910
Time: 1644-1706
Viewer: 018
Session: 01
Monitor: 052

SUMMARY OF INFORMATION:

SG1A

SG1A

1. TASKING: Determine the nature of the association, if any, between the target vessel identified as [REDACTED] and the base station utilizing the Call Sign, [REDACTED]

2. RESULTS: The base station was accessed. It is a "house" which is surrounded by a clearing in trees, near a body of water. There is a single, dark complected male person in it who is working the radio, and who is (at least socially) isolated and bored.

The base station acts as a "message center" or "middle man" for the ship and other entities, passing on instructions, directions, warnings, messages, info, etc., and receiving messages from the ship. The "warnings" appear to often deal with actual locations of law enforcement assets.
