049

PROJECT NO. 91001

TASKER

Coordinates: FT 91001

1. (S/NF/WN) Mission: Describe the activities associated with FT-91001 (target contained within sealed envelope).

~~SECRET~~ NOFORN/WNINTEL

This document is made available through the declassification efforts  
and research of John Greenewald, Jr., creator of:

# The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)  
document clearinghouse in the world. The research efforts here are  
responsible for the declassification of hundreds of thousands of pages  
released by the U.S. Government & Military.

The activities associated with the target are predominately buried or at least hidden from view. The area surrounding the activity(ies) has been manipulated, shaped or otherwise altered by humans. There is a perception that there are several different activities taking place simultaneously. However, the main activity is associated with an aspect relating to solar energy or solar energy related production/research. There is the feeling that high energy light or energy streams are also associated with the target.

Except for the "V"-shaped feature (see diagrams 2 and 3), all of the sounds, objects, functions, etc. that were perceived are either underground or otherwise hidden in some fashion. One area contains objects which resemble small, black balls moving around. Another area contains a cone-shaped object with written characters along one side and a circular feature on the large end (see diagram 7). There is an alignment of squarish-shaped objects which are shiny, flat and smooth (see diagram 1). They are supported at an angle. A bright, silvery color reminiscent of light reflecting off of a shiny surface is associated with these objects.

~~SECRET~~ UNIFORM

~~SECRET~~

The "V"-shaped feature (diagrams 2 and 3) is within an area where there has been a great deal of manipulation/alteration of the land. There is a rocky or jumbled area adjacent to one side of the "V" feature. An overhang occurs within the side of the "V" feature. There is a large, circular object with intersecting lines within this area. This overhang area is also very dark and hollow. The side of the "V" feature opposite the overhang itself has grate-like structures along its length. The surface above this side has been smoothed over. There is an area that is either hidden and/or buried here that is hollow and contains a lot of activity and sounds. There is the impression of layers of superimposed angles, lines and corners within this "hidden" area. There is movement with a few individuals present. There is a lot of mechanical activity. A rhythmic, mechanical-throbbing sound is present as well as a bubbling sound. This is reminiscent of liquid being pumped. This "hidden" area and its contents are associated with the primary activity of the target.

There is a hidden, circular area within the target that is extremely hot. The source of this can not be seen but the heat can be felt through the solid surroundings. There is a hazardous aspect associated with the "hot spot".

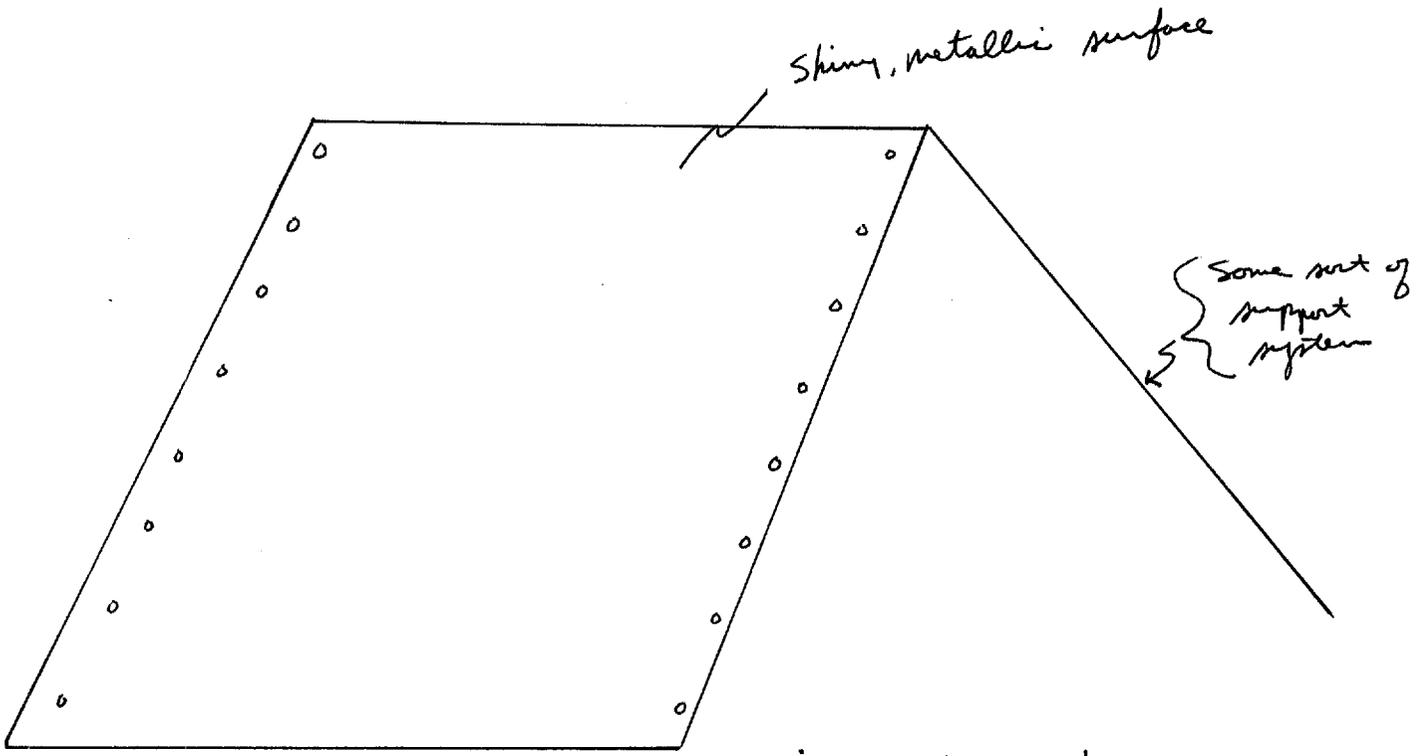

There is one individual present on site who is preoccupied with looking up.

~~SECRET~~/NOFORN

~~CONFIDENTIAL~~

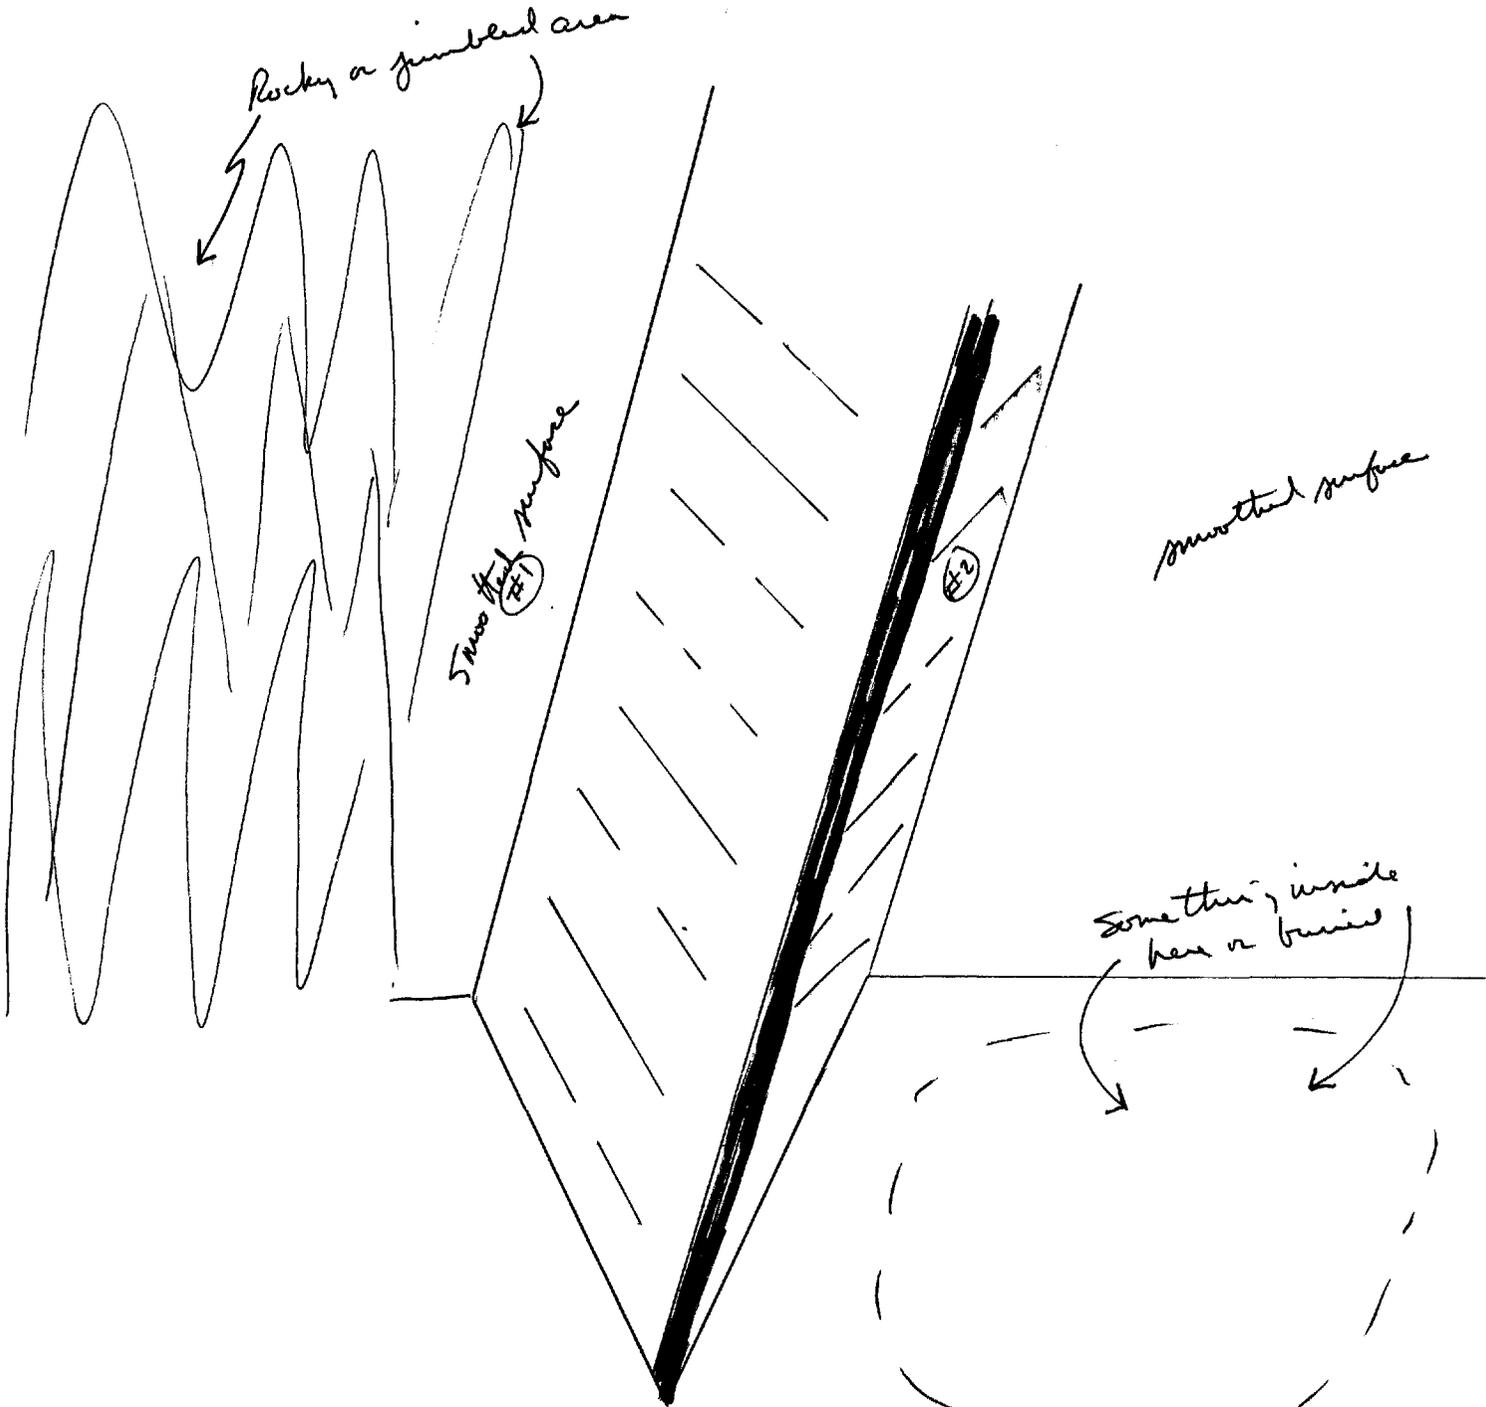

There are two semi-circular objects which set adjacent to one another (see diagrams 5a and 5b). They both contain a stepped-like or terraced aspect with them. Another object (see diagram 6) consists of a series of half circles connected by bars. These are associated with a dark gray series of tall rectangular objects. These objects are arranged giving a saw-tooth effect or appearance.

~~CONFIDENTIAL~~ UNIFORM

There are a number of these objects in a linear alignment.

45° downward view

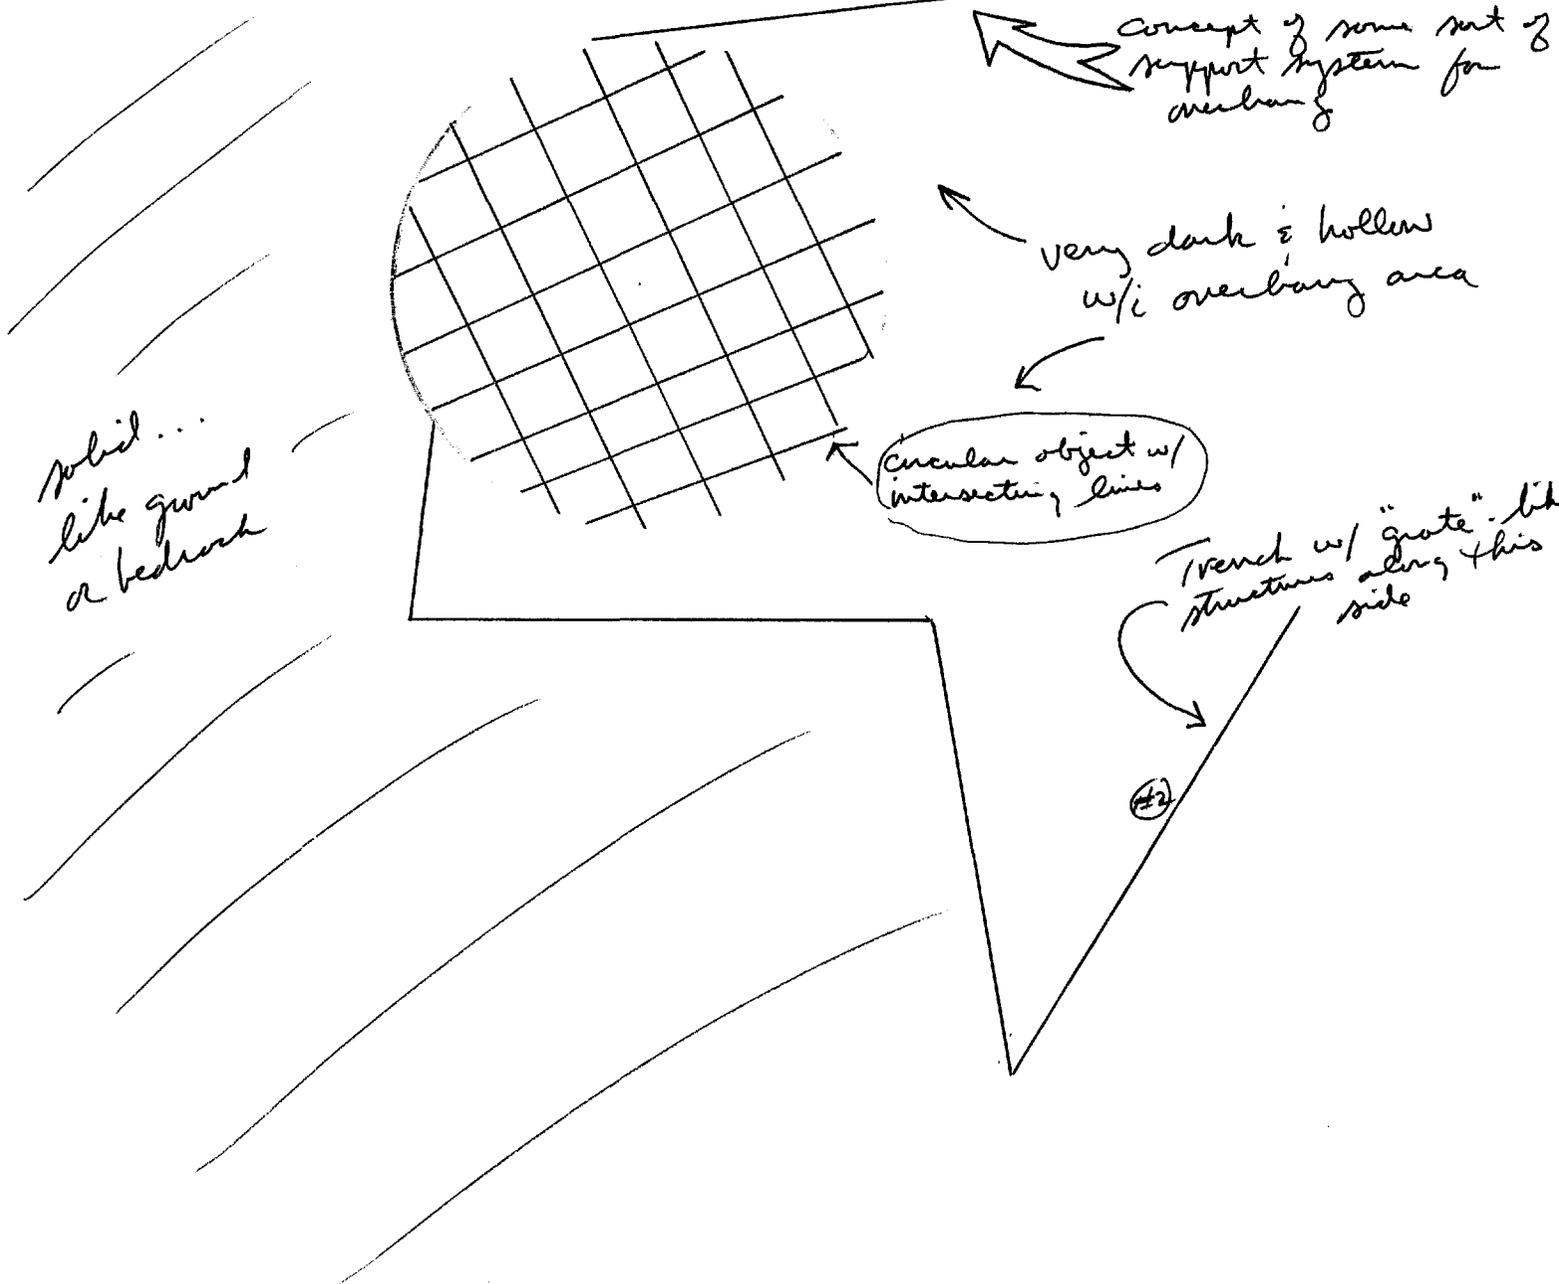

"V" shaped trench-like feature; land associated with it has been manipulated /shaped

#1 & #2 : see diagram 3

(#1) Smoothed surface

manmade overhang

solid...  
like ground  
or bedrock

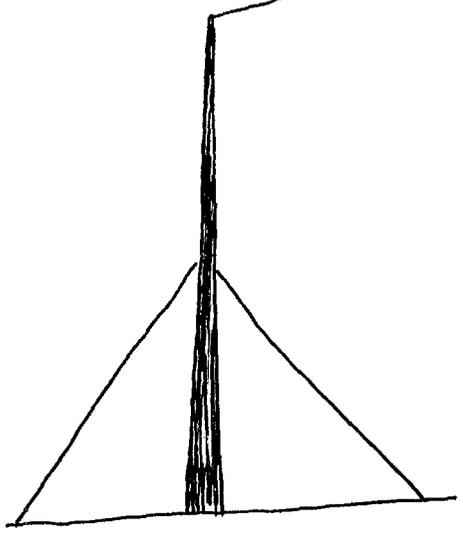

Concept of some sort of  
support system for  
overhang

very dark & hollow  
w/i overhang area

Circular object w/  
intersecting lines

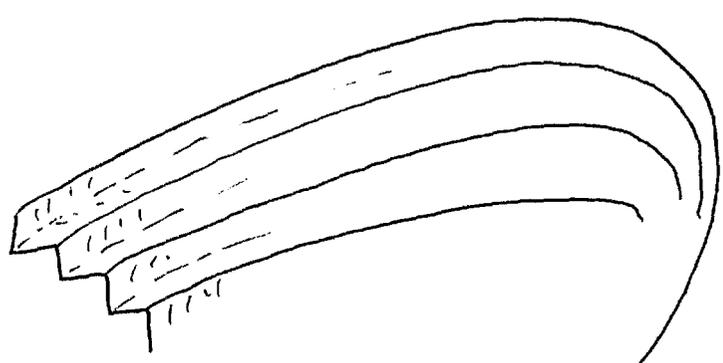

Trench w/ "grate"-like  
structures along this  
side

Diagram 4

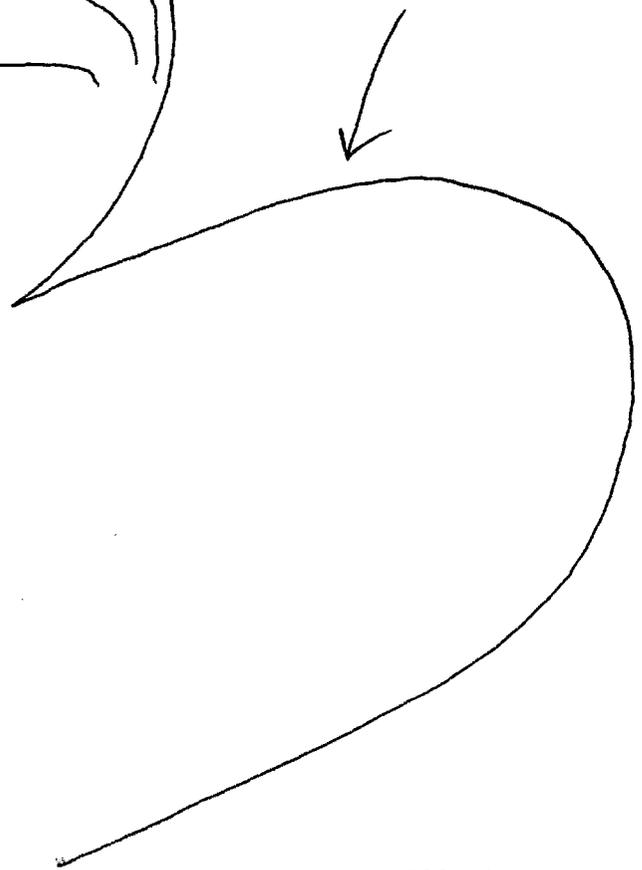

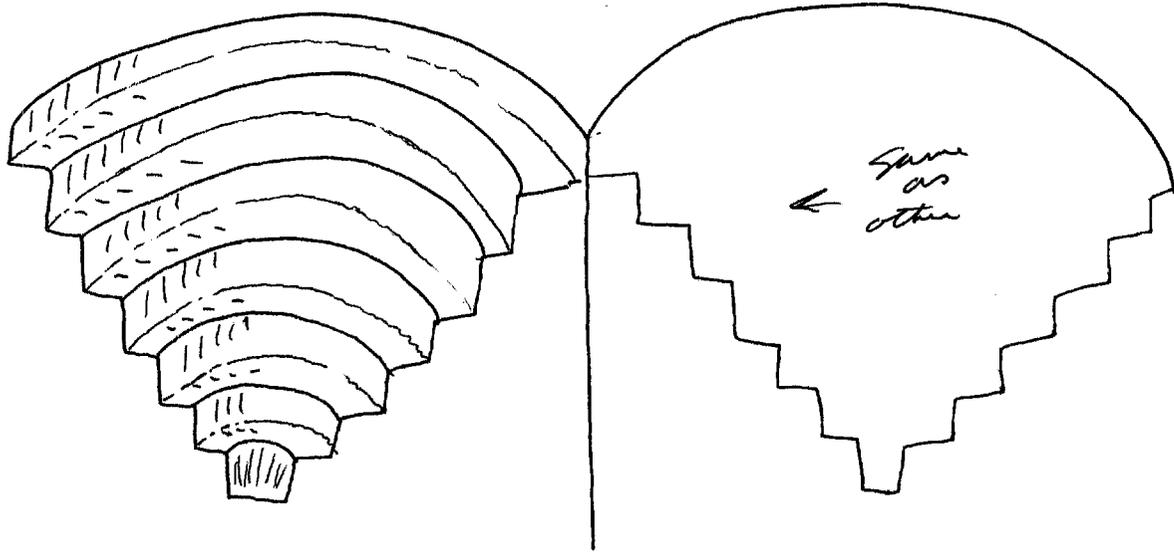

This object is associated  
with a lot of straight  
lines

Diagram 5a

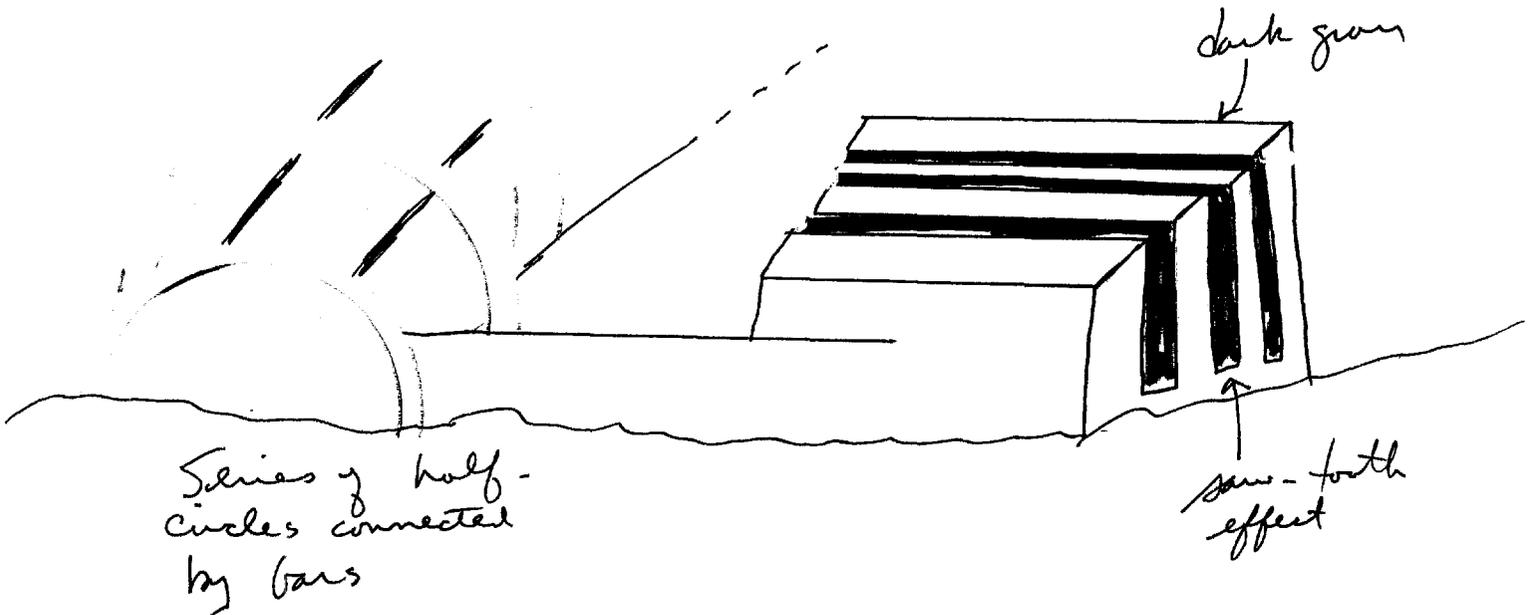

← semi-circular area  
w/ stepped / terraced  
down make up inside

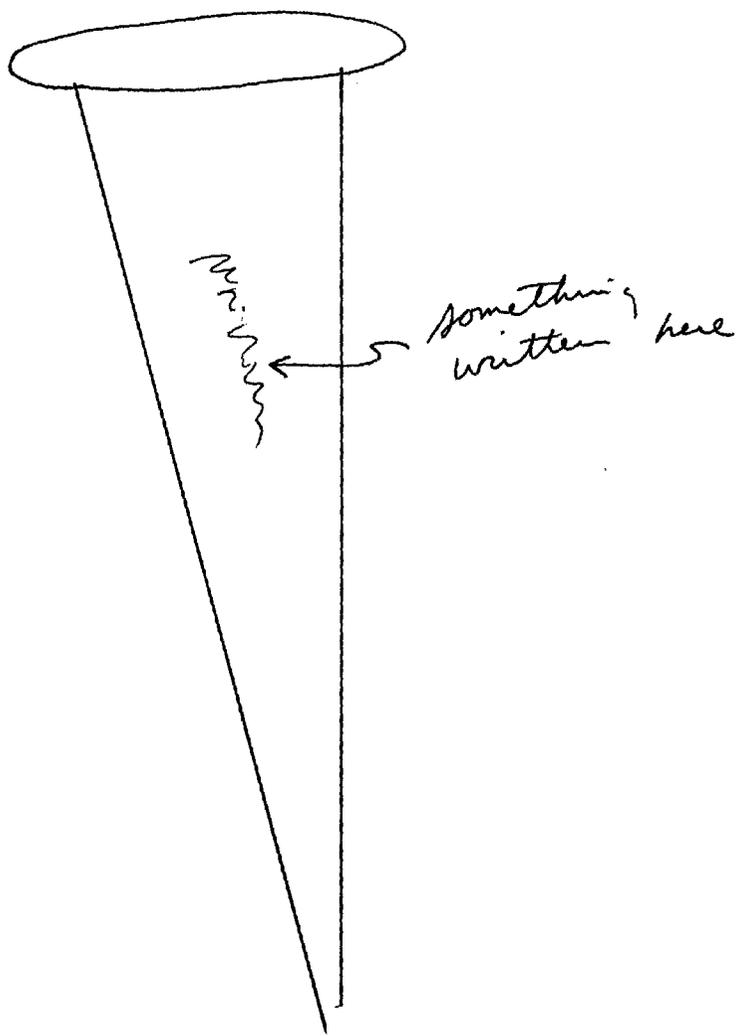

Front view: both areas have identical stepped or terraced like features; a stepped-down effect w/i objects.

Series of half-circles connected by bars
