PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 'F'
Date of Session	: 25Nov86
Date of Report	: 26Nov86
Session Number	: CRV-03
Source Identifier	: RV-021

*months 099*

1. (S/NF/SK) Tasking: Subsequent to CRV-02, ops officer allowed monitor access to all available tasking data. Monitor and ops officer then discussed the possibility that earlier cueing (see previous sessions) was, in some way, not 'directing' sources to the target/intel question. Complete tasking data attached.

2. (S/NF/SK) Session: Source declared PI - chest pains and cut hand. Same encrypted coordinates as last session was initial cue. After source found herself perceiving a city and buildings, monitor moved her to the top of a building where source perceived a tall, circular object. Monitor felt that source was on target and that object was the key target reference point. S6 was then utilized to satisfy further requirements.

3. (S/NF/SK) Summary: Source described a cold, dreary city location with a river nearby (AOL-"Moscow"). Near a group of large buildings is a tall, circular, solid object, later described as the top of an "air shaft". This shaft was part of the ventilation system for three below-ground -level horizontal tunnels. The first level down was described as a "subway" tunnel, the second level as containing a type of modern "people mover" and the deepest level as a sewer system. Although source was reminded of a similar site that she had worked before, no "command post", etc. gestalt was detected. People in the second level, however, were "giving directions to or talking with" people in another location (monitor did not direct source to follow tunnel to other locations).
