PROJECT SUN STREAK (U)

ERV SESSION PROCEDURES REPORT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CONTROL NUMBER:	NICKNAME: OTHER "G"
DATE OF SESSION 26 Aug 86	TARGET COUNTRY: UNK
REFERENCES: SPR-001-86, DTD 26 Aug 86, SAB	SESSION NUMBER: 02
DATE OF REPORT: 28 Aug 86	MISSION STATUS: Continuing
TECHNIQUE UTILIZED: ERV	SOURCE IDENTIFIER: 101

1. () TASKING: In the absence of the operations officer (official leave) no further tasking was provided to the Interviewer prior to this session. Source was told only that from the limited information in the Interviewer's possession it would appear that Source had acquired the proper site and that future sessions, including this session would be utilized to describe the multiple tasking at this site. Source was also provided the same encrypted coordinates as the previous session as per Extended Remote Viewing (ERV) protocols. No other cueing or descriptive data except that quoted above was provided to Source pertaining to this site.
2. () SESSION: There were no unusual occurrences per external environmental conditions known to Interviewer which may have influenced the results of this session. Source did complain of some back pain, due to an old injury, but stated that he did not believe that his discomfort would affect this session. Source's observed hypnagogic state did not display any significant adverse manifestations which would indicate to the Interviewer that a proper Remote Viewing altered state of consciousness was not being maintained. The session was conducted utilizing only standard ERV protocols.
3. () SUMMARY:
 - a. () The following narrative, contained within quotation marks, is an abridged version of Source's post-session written summary. This summary has been editorialized, (as indicated), by the undersigned for clarity, grammar and structure. The actual unagridged summary is maintained in the mission field dossier at this location along with any other material produced during this session, e.g., sketches, notes, etc). "(at the site there is an) oddpshaped buildng. (There are) impressions of (the letter) "E" and also the figure of a cross (in relation to the shape of the building). (There is) cleared areas around the building. Some of (the) sides of the building are at right angles to each other (and other do not form right angles). There is an elevated walkway through an open area (around) the building. On the first floor (of the building) is a room....in which there

is a device which looks like a podium (except) that the light (normally used to illuminate the speakers notes) appears to be pointing out (into the audience). There is another device which is composed of many components. One of (the) components consists of two rollers or brushes (like the type found in a generator motor). (These rollers) (brushes) face each other and move. In (the rear) of the room is a small room with a red light, (which reminds me of a photographic darkroom). This is (used) with the door shut and the red light on. (At the time(there are two men in the room and a cabinet with very narrow drawers. On the sixth floor is a complex of two (administrative) offices and separate large room. (This room) contains a large (long) table and a (viewing) screen. (The) room is empty (at the time of viewing) and the door is open. (When viewed at a time) when the room is occupied, (I see) that only about half of the chairs (around the table) are occupied. (I sense) that the people (are both) military and civilian (but the meeting) is controlled by the civilians. The military (are dressed) in dark blue uniforms and (do not) say much (accept) to answer questions (without) volunteering information. (Around) a podium (by the viewing) screen there are (several) men standing. They (appear(to be civilians but (I sense) an underlying military quality. The (odd shaped) building is (located) near an old city (which contains numerous) official buildings and monuments. There is a river nearby but I can only sense that (without) really seeing it."

b. () During the actual session, Source reported other data which may impact on the final assessment of this target. That data is listed below in raw unevaluated form:

(1) () On top of the odd-shaped building is box like structure, metallic with sharp corners. The purpose of this structure is unknown.

(2) () On the first floor, location #2, (specific tasking), there is the containing the podium (with lights pointing out to the audience) there are other machines (in addition to the machine with rollers/brushes). The other devices are components to the overall purpose of the room. A sound of machinery moving back and forth with a muted swishing sound. ?

(3) () In the "red lit room," the cabinet with narrow drawers contained spools, rolls, wires, sponges and items of documentation . A preconception (AOL) of the words "lactex" and fungi come to mind for unknown reasons.

(4) () On the sixth floor, location #1 & #2 (specific tasking), is located one three room complex referenced above. The room contains what appears to be flags (standing by the viewing screen) and rich, dark colored furnishings and wall paneling. Key words perceived during the referenced meeting included: "systems, elongated, charts" and "chidings (sic." a visual of a ship or boat located in a narrow channel, canal or canal lock was also perceived. In reference tho this perception of a marine vessel there were other key words such as: "conversion, altering, updating, modernization and upgrading." The perception strongly indicated that the vessel in question was not a warship and the words pertaining to the vessel could and did apply to the people associated with the craft. ?

4. () OPS FEEDBACK: In the continued absence of the Operation's Officer, (who is knowledgeable of the actual target), no feedback was possible following this limiting factor and accepted the lack of feedback with expected professional aplomb. Further sessions are planned and in lieu of any direction to the contrary, a presumption will continue to be made that Source has acquired the proper target and information he is providing is valid to the extent that it is reported

to and recorded by the Interviewer (the undersigned) who, like Source, is not knowledgeable of the actual target. Source was not told if or when further sessions pertaining to this target would be conducted.
