SUBJECT: Proposal for and initial specifications of
Project SUN STREAK bibliographic database. (U)

re: Memorandum, "Database programming for SUN STREAK bibliography (U)",
01 NOV 90

1. (U) In accordance with verbal tasking received on 31 OCT 90, the following design for a bibliographic database has been generated and requires approval before programming can continue.
2. (U) PURPOSE: To provide Operation SUN STREAK with a bibliographic database which will allow timely retrieval of information about books, articles, papers, etc. in print on subjects related to SUN STREAK theories, principles, and SUN STREAK.
3. (U) EQUIPMENT: The database programming will use DATABASE III+ as a database vehicle, working on a Zenith 248 stand-alone system (IBM compatible).
4. (U) PROGRAM SPECIFICATIONS: In-house generated programming will handle input/output operations, set up of data fields, input of data, and backup and maintenance of the data files.
 - a. DATA INPUT:
 - 1) Programming will include a specialized user interface program which will allow simple input, editing, and deletion of records by more than one user.
 - 2) Provision is made for bulk entry, typed in from bibliographic lists, or by single entry, as any one Project Officer finds a new book or magazine article and wants it added to the database.
 - 3) Programming will allow for merging of data records which have been input by several different users on different machines.
 - b. INFORMATION RETRIEVAL: The database fields will be specifically designed to meet the following retrieval requirements:
 - 1) Find an entry according to title (or from input of only a part of the title, if that is all the requestor can remember).
 - 2) Find an entry according to author.

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)
document clearinghouse in the world. The research efforts here are
responsible for the declassification of hundreds of thousands of pages
released by the U.S. Government & Military.

Discover the Truth at: <http://www.theblackvault.com>

- 3) Find an entry according to exact or approximate date.
- 4) Generate a list of books/articles/papers dealing with any one selected subject matter (see Item 4.c., below).
- 5) Generate a list of books/articles/papers which have been published by any one publisher, author, magazine, college press, or other publishing source.
- 6) The database should also indicate whether or not the material is in our library.

c. Subject matter fields which will be tracked are as follows (in alphabetic order):

- 1) Animal ESP
- 2) Automatic writing
- 3) Bilocation
- 4) Biological aspects of ESP
- 5) Channeling/ mediumship
- 6) Clairvoyancy
- 7) Dowsing
- 8) ESP aids (use of hypnosis, drugs, etc.)
- 9) Evaluation techniques
- 10) Governmental (foreign & domestic) involvement
- 11) History of ESP
- 12) Levitation
- 13) Out-of-body experiences
- 14) Personalities
- 15) Psychokinesis
- 16) Poltergeist phenomena
- 17) Predictive methodologies
- 18) Reincarnation

- 19) Research
- 20) Search
- 21) Techniques used in ESP
- 22) Telepathy / mental transference
- 23) Terminology
- 24) Theories of ESP
- 25) Viewing (remote viewing)

d. FORMAT: Both data entry and information retrieval will be accomplished using the an input screen similar to the following (new fields may be added as the program is finalized):

```

+-----+
| TITLE: _____ |
| AUTHOR: _____ DATE: _____ |
| PUBLISHER: _____ IN OUR LIBRARY: _____ |
+-----+
| ENTRY DEALS WITH: (Place an X in every category which applies) |
| Animal ESP _ Auto.Writing _ Bilocation _ Biological _ |
| Channeling _ Clairvoyance _ Dowsing _ ESP aids _ |
| Evaluation _ History _ Levitation _ OOBEE _ |
| Persons _ PK _ Poltergeist _ Prediction _ |
| Reincarnat _ Research _ Search _ Techniques _ |
| Telepathy _ Terminology _ Theory _ Viewing _ |
+-----+
    
```

1) Data entry will be accomplished by filling out the blanks with the appropriate data and appending the record to the database.

2) Information retrieval will be accomplished by filling in those fields which are desired or known and pressing a request button for the record, the list of records, or for a notice that no such record exists.

5. PROJECTED WORK SCHEDULE: The following proposed time schedule should allow for unforeseen interruptions:

TASK	PROPOSED COMPLETION DATE	STATUS
PHASE I		
Initial DB programming	01 NOV 90	Done
Request for desired OUTPUT sent	01 NOV 90	Done
Receipt of desired OUTPUT info	09 NOV 90	----
Completion of DB programming	14 NOV 90	----
Input of data begins	14 NOV 90	----
Completion of Phase I input	21 NOV 90	----
Final test of Database retrieval	22 NOV 90	----
Report of Phase I completion	23 NOV 90	----
PHASE II		
Input of data begins	26 NOV 90	----
Status reports	Monthly
