- E. SESSION SUMMARY:

The site has a very large square structure sitting by itself. There is an object on the side of the structure that is tall and one can move up and down it. Overall, the motion of this object was up and down or in and out. There are some trees and natural habitat around the structure. I could sense green leaves and brown ground. At first the structure looked like it was a beautiful building in a beautiful setting.

I had a sense of water and the water may be behind the structure. Around the water are large brown rocks or cliffs.

I could see people take part in an activity. It looked as though the people had to dress differently to take part in this activity. The activity was physical in nature.

I could see a smaller structure behind the big large square structure. This structure was tall and thick and it had a top that could spin or move. At one point I could see a circular object that had something to do with heat transmission.

The animals here tend to be wild or outdoors.

It can be very quiet here and very dark.

The people here sometimes looked like they were in darkness and they needed light or carried light.

(Sometimes its looked as though people were scuba diving?)
