- E. SESSION SUMMARY

The target is a large structure which is essentially oblong shaped with screws and a metallic framework. This structure moves at a fast rate and emits combustion elements which are fiery/fumes etc...It is a scientific high technology object which engages in air flight. This object is government/military related and is used by such personnel. The structure emits an incredible luminous light which ejects from one end while in motion. It is powerful energy which is technical inside, wired, and rounded on the surface. This machine is graphic in its design and has doors or flaps on the sides wherein things may be omitted. It is for the purpose of viewing things or for spying/targeting land areas and is considered a strategic device. It is made in such a fashion that it can combat certain atmospheric conditions and may travel into space or on the edge of sky and space in its performance. It can pick up on certain targeted areas by a graphic technique and may record such data. This structure makes a powerful loud noise or sound when engaged. This target reminds me of a rocket, F-29 (MIG) type of aircraft, or satellite without wings but is not a plane. The object travels through the air and has a United States emblem on its side.

TASKING SHEET

SOURCE NO: 025

DATE: 17 FEB 93

SUSPENSE: 18 FEB 93

1200 hrs

1. PROJECT NUMBER: 93-165-P

2. METHOD/TECHNIQUE: Method of Choice.

3. BACKGROUND:
----This project marks the start of a new proficiency series that is based primarily on a target of "structures/configurations."

-- These configurations can be anything. However, buildings/structures will be dominant.

-- Targets will emphasize key elements that are unique or distinct. They will be composed of specific shapes, contours, configurations. Some targets may have multiple similar shapes/features.

-- Targets may be commercial, governmental, military, or other, either historic or contemporary.

----Some targets will have a beacon person; others will not.

----There will be 10 targets in this series. They will be randomly selected from the target pool.

4. ESSENTIAL ELEMENTS OF INFORMATION: _____

----Describe/sketch the key features/shapes/contours of the target.

----Describe/sketch spatial relationships or relative sizes of the target features.

----Determine other features (colors, background), if dominant.

----Determine the purpose of the target structures.

COMMENTS:

---- This target has/does not have a beacon person. (MS)
