- E. SESSION SUMMARY

The target is a structure. An area is round and almost bulbous in its dynamic. Ventilation or atmospheric air is important to the site. An area of the photo is dark or black. There are large bump formations rising from the surface which are essentially triangular in shape. They have a wider base/foundation and are considerably thinner or even pointed towards the top. This is a geographical description. Conceptually, I could see was hands holding a delicate globe shaped object. This site has something to do with care and creativity. The target is relative to the ground, earth or stone and may be time sensitive.
