- E. SESSION SUMMARY

The target is a structure which has a spiralled area which winds upward to a high top area. The top part has an inside and an outside and can emit light. The structure itself is known to have windows and doors and is unusually shaped in its design. People visit the top portion of this structure. It can be considered a land mark by some because of its peculiarity.

Another structure envisioned during this session was a historical red brick building with thick off-white trim and is either a school or medical building.
