- E. SESSION SUMMARY:

The overwhelming concept of this target is a an association with recreation and/or resort/hotel. There is movement from one location to another by many people. Fast moving objects are moving via winding movement. There are rotating, curving and spinning motions associated with these people/objects. It feels as if they are gliding over a surface.

The surrounding is very bright white and it is difficult to ascertain rather it is snow, ice or water. There is a spectacular view of the surrounding area.

There is the presence of a "natural force"; a movement of great power; an unstoppable natural power. This movement/power is slow, regular and not catastrophic. It is, in fact, "as regular as the tides".

The following concepts were perceived: one of "hanging suspensions"(see page i[a]); one reminiscent of a hotel/resort setting (page i[b]); one of a hotel/office building with exposed elevators (see page ii); a curving, trough-shaped feature associated with sliding, gliding or slipping; **ascent/descent**; one of a research facility associated with "fun"; and one of mountains.
