The target contains one structure that is open and airy. It sits along a set of parallel lines. It is associated with a long, round cylindrical object which has a circular, rotating motion and is energized. A ring moves up and down, or back and forth, along the axis of the latter object.

There is another structure which appears as a squared-off horse shoe with two levels. This particular structure feels old; *(see diagram C, page ii)*.

The concepts of "configuration" and "folded objects" are associated with the round, cylindrical object (see page iii). There was the feeling that something large passed overhead. This object had a pulsating, energetics sound.

There is an overall feeling that I was orbiting earth and the concept of being in an "outer world". The target feels "space oriented". There is a very scientific feeling to the target. Also that of research and exploration.
