Fort George G. Meade, Maryland 20755

Dear Brian:

(S/CL-3/NOFORN) I thought that I would provide you with a status report with regard to the screening/selection task.

- (1) Our major consultant, Dr. David Saunders, now has the WAIS results for 6 calibrated remote viewers who were part of our IEEE published data base.
- (2) We also have collected the WAIS results for 13 other remote viewers who are currently participating in on-going remote viewing programs. We will be obtaining RV calibrations for these people throughout the year.
- (3) We are obtaining the results from 1300 responses obtained during a nation-wide RV/psychological test that appeared in Omni magazine. The psychological questions were developed by Saunders for Mr. Stephan Schwartz, the program director.
- (4) We have arranged for a three-fold laboratory cooperative effort (SRI, Princeton, Mobius) to analyze the RV results in a statistically meaningful way and to correlate the 1300 responses with the results of Saunders' psychological analysis. Since Saunders developed the "self report" questions on the basis of his general knowledge of the PAS, we are fortunate to have such a large database with which to work.
- (5) Under another program, we are modifying Dean Robert Jahn's RV judging procedure to fit more closely our form of remote viewing. The statistical output of this procedure, which is available to us, allows quantitative results to be calculated for each RV response. This is necessary to allow meaningful correlations with the results of the psychological analysis.

(6) We have obtained the services of a psychologist, Dr. Nevin Lantz, who will provide us with a detailed analysis of Neuro Linguistic Programming with regard to its validity as a psychological process and its potential as an RV screening procedure. NLP has received a lot of public attention lately, and Dr. Lantz will help us determine which claims, if valid, might be applicable to our problem.

(U) Please feel free to contact me if you have questions on what we have done to date, or if you have suggestions for the direction of the investigation.

Best regards,

Edwin C. May, Ph.D.
